## Sean Gaston

SEAN GASTON DESIGN

### MEDINA HOUSE

*Master Bedroom/Bathroom, Closet, Atrium*

Growing up, Sean was always surrounded by design and art as influenced by his mother and grandmother. He recalls his grandmother's home and his own childhood home changing constantly as each would be redecorated to reflect the upcoming season. At a very young age Sean began participating in this process and naturally began to see things in a different way.

His early professional career influenced fashion and residential retailers including Williams Sonoma, the Gap, Inc., Pottery Barn and Restoration Hardware before he established his own company more than ten years ago. In addition to his design firm Sean Gaston Design, he directs all design for residential builder, Bee Renovated, Inc.. He has focused on the renovation, preservation and interior design of homes throughout the San Francisco area and Southern California.

His work is a thoughtful process described as, "curated and collected... not decorated." He possesses a unique instinct to discover obscure treasures others might overlook...the art and artifacts of flea markets and estate sales. Sean states, "It is these very pieces that give a space depth, a sense of history and its soulfulness." He is known for his artful blend of vintage and modern furnishings with a handsomely chic, comfortable and sophisticated point of view. ■
